**DETAILED ACTION**

1. This communication is responsive to the application filed 12/06/2001.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) The invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Ki et al. (U. S. Pat. - 5,848,174).

Regarding claim 1 and 6, Ki et al. disclose a speaker system, comprising: a back plate with a raised axle (Fig. 1); a permanent magnet (20) mounted on top of the back plate around the raised axle; a front plate (22) enclosing the permanent magnet around the raised axle; a voice coil (40) attached to the top of the raised axle; a terminal (70) electrically connected to the voice coil; a cone (30) with a top and bottom attached to the top of the voice coil; a surround (50) attached to the top of the cone on one side and attached to a gasket on the other side; a spider (66) attached to the bottom of the cone on one side and to a basket (10) on the other side; a dustcap (Fig. 1) covering the top of the cone; and a flexible support member (62) supporting the cone, wherein the flexible support member substantially reduces the stress on the spider and the surround by providing additional support to the cone as claimed.

Regarding claim 2, 4, 7 and 9, Ki et al. further disclose the speaker system, wherein said flexible support member is a spring (62) placed between the back plate and the dustcap or between the basket and the cone (Fig. 1) as claimed.

Regarding claim 3, 5, 8 and 10, Ki et al. further disclose the speaker system, wherein said flexible support member (62) is an air pump placed between the back plate and the dustcap or between the basket and the cone (Fig. 1) as claimed.
